

DISCOVERING DINOSAURS

Diplodocus (dih-PLOD-oh-kus)

Name Meaning: double beam

Temporal Range: 154–152 million years ago

Diet: herbivore

Height: 9.2 metres

Length: 27.2 metres

Weight: 22 700 kilograms

Description: The longest dinosaur skeletons ever found belong to the *Diplodocus*. Its snout was unique, with nostrils on the top and teeth like piano keys at the front only. *Diplodocus* had a very small brain for its size. It ate high leaves by standing up on its back legs.

Stegosaurus (STEG-uh-SAWR-us)

Name Meaning: roof lizard

Temporal Range: 155–150 million years ago

Diet: herbivore

Height: 4.5 metres

Length: 8.5 metres

Weight: 3000 kilograms

Description: *Stegosaurus* had large triangular plates along its back, which flushed with blood and may have warned predators or regulated its temperature. Its tail sported four massive spikes, which were used to defend it against attacks.

Tyrannosaurus Rex (tye-RAN-uh-SAWR-us-REX)

Name Meaning: tyrant lizard

Temporal Range: 68–66 million years ago

Diet: carnivore / scavenger

Height: 7.1 metres

Length: 8.5 metres

Weight: 7250 kilograms

Description: *Tyrannosaurus rex* is probably the most famous of all dinosaurs. It had a huge skull full of long, saw-like teeth. Able to chase down prey at 48 km/h, *Tyrannosaurus rex* is also known to have scavenged on rotting carcasses. Its tiny front arms are the basis of many jokes.

DIGITAL WARRIORS

SCROLL TROLLS

I WONDER WHAT'S ON BRITNEY'S WEBPAGE...

ARGH! I AM SO SICK OF HER CAT PHOTOS! I AM GOING TO COMMENT AND GIVE HER A PIECE OF MY MIND!

@beau

Your cat is..!

THERE, NOW SHE KNOWS.

NEXT DAY...

BEAU, I CAN'T BELIEVE YOU PUT THAT ON BRITNEY'S PAGE. SHE IS SO UPSET!

BUT HER CAT PHOTOS ARE AWFUL. I HATE CATS!

YEAH! LEAVE BRITNEY ALONE!

BUT YOU CHOSE TO GO ONTO HER PAGE. IF YOU DON'T LIKE HER CAT PHOTOS, DON'T GO ON HER PAGE AND LOOK AT THEM.

HOW TO MAKE A NEWSPAPER PIRATE HAT CRAFT ACTIVITY

Arrr... me hearties! It's time to make a pirate hat to wear at sea.

Materials

A rectangular sheet of newspaper

Sticky tape

Instructions

1. Place a rectangular sheet of newspaper on a flat surface in a portrait layout.
2. Fold the sheet of newspaper from top to bottom and create a crease.
3. Fold the folded sheet of newspaper from left to right, create a crease and unfold.
4. Fold the top left corner towards the middle crease to create a triangle.
5. Repeat the previous step with the right hand side.
6. Add a small piece of tape to hold the triangles together.
7. Take the top layer of paper from the bottom section of your hat and fold it upwards so that it covers the bottom section of the triangles.
8. Turn the paper over and repeat the previous step.
9. Avast ye! Open up your pirate's hat!

Follow the steps to make a newspaper pirate hat.

The Haunted House

Inference

As her foot stepped over the gateway, she felt a shiver go down her spine as her imagination ran wild. The owls and bats were flying around, which made the whole thing even spookier. She cautiously crept up the broken, overgrown path and towards the front door where something scratched her leg as she stepped up to the veranda through the undergrowth.

Then a light flickered on and off in the hallway. This was all that was needed to make her turn back and run as fast as she could, dropping some of her leaflets in her haste.

Sharks

Purpose

Sharks are one of the sea's most famous predators, but there are some facts that might surprise you...

Sharks are the top carnivores (meat eaters) of the oceans and the top of the food chain eating other fish, dolphins, seals and would you believe it – seagulls! They have the most powerful jaws of any animal and hundreds of teeth that even replace themselves if they fall out!

Strangely enough, not all of them attack people. Often, it is the biggest ones that are the most harmless. The whale shark is the biggest of them all; it eats plankton and small fish and shrimps but it measures nearly 14m – that's about the length of one and a half doubledecker buses!

Mapping Landscapes: The Story of Gulaga

This is a Dreaming Story told by the Yuin people of the Tilba Tilba region, located on the south coast of New South Wales, Australia. The Story explains the creation of Gulaga (Mount Dromedary), Barranguba (Montague Island) and Najanuga (Little Dromedary). Gulaga is a site of great spiritual significance to the local Yuin people. She is the mother of their ancestors and a symbol of their spiritual identity.

This is the story of Gulaga, the mother mountain. She had two sons called Barranguba and Najanuga.

One day, Barranguba (the older son) decided to move away from his mother. When he told Gulaga what he wanted to do, she told him to move into the ocean nearby. Barranguba could watch the fish and the whales and the dolphins from there, but he would be close enough for Gulaga to keep an eye on him.

So Barranguba went out into the ocean and became an island.

Najanuga (the younger son) saw what his brother had done. He wanted to do the same. When he told Gulaga what he wanted to do, she told him he was too little to go out into the ocean on his own. Gulaga told Najanuga to sit right by her feet, so that she could keep watch over him.

So Najanuga stayed next to Gulaga, watching his big brother out in the ocean. He is the small mountain that sits beside the great mother mountain. He stays with her always, just as she wanted.
